Fatal Work Injuries in the Washington, DC Area — 2017

Fatal work injuries totaled 63 in 2017 for the Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area, the U.S. Bureau of Labor Statistics reported today. Sheila Watkins, the Bureau's regional commissioner, noted that the number of work-related fatalities in the Washington metropolitan area decreased by three from the previous year. Fatal occupational injuries in the metropolitan area have ranged from a high of 99 in 2005 to a low of 43 in 2015. (See [chart 1.](#))

Nationwide, a total of 5,147 fatal work injuries were recorded in 2017, down slightly from the 5,190 fatal injuries reported in 2016, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

Chart 1. Total fatal occupational injuries, Washington Metropolitan Statistical area, 2008–2017

Source: U.S. Bureau of Labor Statistics.

In 2017, the Washington metropolitan area had the sixth-largest population nationally^[1] and had the second-lowest number of work-related fatalities among the 10 largest metropolitan statistical areas in the United States. (See [table 1](#) and [chart 2](#).) The most populated metropolitan area in the country—New York—had the highest number of workplace fatalities (215) in 2017. The smallest of the 10 metropolitan areas—Boston—had the seventh-highest fatality count with 74 deaths.

Chart 2. Total fatal occupational injuries in the 10 largest metropolitan areas, 2017

Source: U.S. Bureau of Labor Statistics.

Type of incident

In the Washington metropolitan area, transportation incidents was the most frequent fatal event, resulting in 16 fatal work injuries during 2017, an increase of two from the previous year. (See [table 1](#) and [table 2](#).) The share of total fatalities due to transportation incidents in Washington (25 percent) ranked sixth among the 10 largest metropolitan areas during 2017.

Violence and other injuries by persons or animals and falls, slips, or trips were tied for the second-most frequent type of fatal incident in the Washington metropolitan area, accounting for 14 fatalities each. The Washington area's share of total fatalities due to violence and other injuries by persons or animals (22 percent) ranked third among the 10 largest areas behind Houston (24 percent) and Los Angeles (23 percent). Washington's 22-percent share of total fatalities from falls, slips, or trips ranked sixth among the 10 largest areas.

Nationally, transportation incidents remained the most frequent fatal workplace event in 2017, accounting for 40 percent of fatal work injuries. (See [chart 3](#).) Falls, slips, or trips was the second-most common fatal event (17 percent), followed by violence and other injuries by persons or animals (16 percent).

Chart 3. Fatal occupational injuries by selected event, United States and Washington metropolitan area, 2017

Industry

The private construction industry sector had the largest number of fatalities in the Washington metropolitan area with 24, compared to 19 in the previous year. (See [table 3](#).) Falls to a lower level was the most frequent fatal event in the construction sector with eight worker deaths. Fifteen of those fatally injured in this sector worked in specialty trade contracting.

The private transportation and warehousing sector had nine workplace fatalities, similar to the count in the previous year. A third of the fatalities in this sector were in support activities for transportation.

Occupation

Construction and extraction occupations and transportation and material moving occupations had the highest numbers of workplace fatalities with 22 and 13, respectively. (See [table 4](#).) Seven of the fatalities within the construction and extraction group were first-line supervisors of construction trades and extraction workers. Heavy and tractor-trailer truck drivers accounted for 6 of the 13 fatalities among transportation and material moving workers.

Contracted Workers

A contractor is defined as a worker employed by one firm but working at the behest of another firm that exercises overall responsibility for the operations at the site of the fatal injury. In 2017, the Washington metropolitan area had nine fatally-injured workers identified as fitting the contractor criteria; of those, four were the result of falls to a lower level.

Additional highlights

- Men accounted for 94 percent of the work-related fatalities in the Washington metropolitan area, similar to the 93-percent national share. (See [table 5.](#)) Transportation incidents and violence and other injuries by persons or animals each accounted for 24 percent of the fatalities for men in the Washington metropolitan area.
- White, non-Hispanic workers accounted for 43 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths. Hispanic or Latino workers accounted for 27 percent of fatal work injuries in the Washington metropolitan area, compared with 18 percent nationwide.
- Workers 25-54 years old accounted for 62 percent of the area's work-related fatalities in 2017, compared to 55 percent of on-the-job fatalities nationally.
- Of the 63 fatally-injured workers in the Washington metropolitan area, 78 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for wage and salary workers was transportation incidents. Contact with objects and equipment accounted for four self-employed worker deaths.
- Nearly forty percent of workplace fatalities in the Washington metropolitan area occurred on a Wednesday or a Thursday during 2017, compared to 34 percent nationwide.

(1) Metropolitan area populations based on 2015 estimates from the Census Bureau.

Technical Note

Background of the program. The Census of Fatal Occupational Injuries (CFOI), part of the Bureau of Labor Statistics (BLS) Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2017 national data, over 23,400 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at www.bls.gov/opub/hom/cfoi/home.htm.

Federal/State agency coverage. The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at www.bls.gov/iif/cfoiscope.htm and www.bls.gov/opub/hom/cfoi/concepts.htm.

Acknowledgments. BLS thanks the District of Columbia Department of Health; Virginia Department of Labor and Industry; and Maryland Department of Labor, Licensing and Regulation for their efforts in collecting accurate, comprehensive, and useful data on fatal work injuries. BLS also appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National

Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Area definitions. The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget, Bulletin Number 13-01, February 2013. A detailed list of the geographic definitions is available at www.bls.gov/lau/lausmsa.htm.

The **Washington-Arlington-Alexandria, DC-VA-MD-WV Metropolitan Statistical Area** consists of the Silver Spring-Frederick-Rockville, Md. Metropolitan Division (MD) and the Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. Metropolitan Division (MD).

The **Silver Spring-Frederick-Rockville, MD MD** consists of Frederick and Montgomery Counties in Maryland.

The **Washington-Arlington-Alexandria, DC-VA-MD-WV MD** consists of the District of Columbia; Calvert, Charles, and Prince George's Counties in Maryland; Arlington, Clarke, Culpeper, Fairfax, Fauquier, Loudoun, Prince William, Rappahannock, Spotsylvania, Stafford, and Warren Counties in Virginia; Alexandria, Fairfax, Falls Church, Fredericksburg, Manassas, and Manassas Park Cities in Virginia; and Jefferson County in West Virginia.

Information in this release is available to sensory-impaired individuals. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.
